KEEP COOL & SAVE MONEY

Commercial HVAC Incentive Program

ENERGYWISESM
Use less. Spend less. Do more.

HVAC systems can account for half of a building's energy usage

HVAC systems are the primary energy consumers in commercial buildings. Improving the performance of your HVAC system not only saves energy, but can have a positive impact on your building occupants' health, comfort, and productivity as well.

Have an old air-conditioner, rooftop unit, or heat pump that should be replaced? Or are you building a brand new facility and considering a state-of-the-art HVAC system that will provide energy savings for years to come? Either way, our Commercial HVAC Incentive Program will pay you for doing so!

The process is easy – just follow these simple steps

1. Visit with your electric utility to discuss your project and pick up an application form. An application form is also available on-line, which makes calculating incentives easy.
2. Select a contractor and install HVAC equipment that meets the criteria identified in the table to the right.
3. Complete an application form after the installation is complete and the terms and conditions are satisfied.
4. Submit the signed application (along with proof of purchase identified in the terms and conditions) to your local utility for the incentive within three months of the installation.

ELIGIBLE EQUIPMENT

| Unit Code | Equipment Type (Split or Package) | Incentive Criteria (SEER Ratings) | Incentive Criteria (SEER2 Ratings) | Incentive |
|-----------|--------------------------------------|---|---|-----------|
| AC1 | Air Conditioner | 16.0 SEER or 15.8 IEER | 15.2+ SEER2 or 15.8+ IEER | \$30/ton |
| AC2 | Air Conditioner - Variable Capacity* | n/a | n/a | \$60/ton |
| AS1 | Air Source HP | 15.0 SEER, 8.5 HSPF or 14.1 IEER, 3.4 COP | 14.3-15.1 SEER2, 7.5 HSPF2 or 14.1-15 IEER, 3.4 COP | \$60/ton |
| AS2 | Air Source HP | 16.0 SEER, 8.5 HSPF or 15.1 IEER, 3.4 COP | 15.2+ SEER2, 7.5 HSPF2 or 15.1+ IEER, 3.4 COP | \$120/ton |
| AS3 | Air Source HP - Variable Capacity* | n/a | n/a | \$150/ton |
| WLHP | Water Source HP** | n/a | n/a | \$150/ton |
| GHP | Geothermal HP** | n/a | n/a | \$330/ton |

* Provide documentation that shows manufacturer, model number and that states the equipment is "inverter driven".

** Any efficiency rating qualifies on water-to-air and water-to-water units

WLHP – Water Source Heat Pump (typically boiler/cooling tower applications); GHP - Geothermal Heat Pump (open loop, earth, or pond coupled).

Table implies new matched indoor and outdoor components. If different, contact your electric utility.

Qualifying systems include:

- Split or package air-conditioners (heat source can be electric or fossil fuel)
- Split or package air source heat pumps (back-up fuel source can be either electric or fossil fuel)
- Split system or package water-source heat pumps (typically boiler/cooling tower applications) or ground-source heat pumps (open or closed loop)

Check with your contractor prior to purchase to ensure your equipment qualifies for an incentive. Send completed and signed application to your local electric utility office.

Incentives valid as of 1-1-2023. Subject to change without notice. Verify current incentive amounts and program information at www.EnergyWiseNebraska.com These EnergyWise™ programs are only available to customers of NPPD and customers of its wholesale utilities.
